

Flight Suit Measurements

1)Neck:

2)Chest:

3)Waist:

4)Hips:

5)Sleeve:

Note: From the end of your shoulder to your wrist.

6)Inseam:

Note: The length that you buy your pants.

7)Torso:

Note: For this measurement, you will be measuring in a big circle. Start with a cloth tape measure at the shoulder seam of the shirt you are wearing, near your neck. Let the tape fall down in front of you. Bring the tape through your legs, up your back and to the place where the tape started. This will make a big circle, measuring your torso. This measurement will help ensure that the suit is not too baggy or not too short in the torso.
